Attack Surface Map + Remediation Guidance

€850

ONE-OFF

External attack surface enumeration paired with a prioritised remediation plan — ranked by exploitability and business impact.

// DELIVERABLES

- External asset discovery and an attack-surface map (as per the standalone mapping product).
- A prioritised remediation plan with each item ranked by exploitability and business impact.
- Specific remediation guidance per exposure.
- A handover/walkthrough session to talk through priorities.

// EXPECTED OUTCOMES

- Not just what is exposed, but what to fix first and why.
- An actionable, defensible remediation roadmap.
- Direct guidance for the team responsible for fixes.

// METHOD OF ENGAGEMENT

External, unauthenticated assessment plus a structured remediation analysis, run remotely. Enumeration, prioritisation by exploitability × business impact, written plan, then a guidance session.

// TIMELINE

Indicative: ~5 business days from scope confirmation, including the remediation walkthrough.

- Project management is included in all prices.
