A 90-minute scoping call to confirm systems, logging availability and retention windows — then a fixed quote for the CRM or infrastructure investigation.

// DELIVERABLES

- A 90-minute scoping call to confirm the systems involved.
- Confirmation of logging availability and retention windows.
- A fixed quote for the CRM or infrastructure investigation.
- Guidance on preserving logs before retention windows expire.

// EXPECTED OUTCOMES

- Certainty about what the logs can still tell you before you commit.
- Log evidence preserved ahead of expiry.
- A fixed price for the full infrastructure or CRM investigation.

// TIMELINE

90 minutes, scheduled on booking. Intake 24 / 7 / 365, response target under one hour.

// METHOD OF ENGAGEMENT

Every case follows the same backbone, scoped to the matter.

PHASE_01 Triage · scoping

Confirm what's suspected, which evidence sources exist, the legal basis, and a fixed quote.

PHASE_02 Forensic acquisition

Bit-for-bit imaging of devices, mailboxes and logs — hashed (SHA-256), write-blocked. Chain of custody opens here.

PHASE_03 Analysis · reconstruction

Reconstruct what happened and when — separating what the evidence proves from what it merely suggests.

PHASE_04 Reporting · findings

A plain-language account for decision-makers plus an exhibit-referenced technical annex built to survive scrutiny.

PHASE_05 Testimony · referral

As needed: regulator packaging, law-enforcement referral, expert statements and courtroom testimony.
