/ MALWARE, RAT & MAAS EXFILTRATION 05C · INVESTIGATION

Exfiltration Investigation — Mobile

from €650 · Per device · quote

> Mobile-specific spyware, RAT and MaaS investigation with a data-exposure assessment for iOS and Android.

// DELIVERABLES

- Mobile-specific spyware, RAT and MaaS investigation.
- A data-exposure assessment for iOS and Android.
- Confirmation of infection and reconstruction of exfiltration from the handset.

// EXPECTED OUTCOMES

- Clarity on whether a phone was compromised and what was exposed.
- Evidence to support containment and notification decisions.

// TIMELINE

Per-device engagement; acquisition and reporting scoped at kickoff.

// METHOD OF ENGAGEMENT

Every case follows the same backbone, scoped to the matter.

PHASE_01 **Triage · scoping**
Confirm what's suspected, which evidence sources exist, the legal basis, and a fixed quote.

PHASE_02 **Forensic acquisition**
Bit-for-bit imaging of devices, mailboxes and logs — hashed (SHA-256), write-blocked. Chain of custody opens here.

PHASE_03 **Analysis · reconstruction**
Reconstruct what happened and when — separating what the evidence proves from what it merely suggests.

PHASE_04 **Reporting · findings**
A plain-language account for decision-makers plus an exhibit-referenced technical annex built to survive scrutiny.

PHASE_05 **Testimony · referral**
As needed: regulator packaging, law-enforcement referral, expert statements and courtroom testimony.
